

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sara Vinarov on August 19, 2009.

On lines 4-5 of claim 1, the phrase "said first end of the container for receiving the sample of whole blood and being sealed;" was changed to --wherein the whole blood is introduced into the container at the first end and the first end is sealed;--.

2. The following is an examiner's statement of reasons for allowance: Application serial no. 10/590,431 is being allowed since the closet prior art to Lee (US 3,761,408) fails to teach of centrifuging the tube containing whole blood to form separate layers of blood cells, a gel layer and a plasma layer, the closet prior art to Carroll et al (US 6,706,536) fails to teach that the centrifuging of the tube produces in relative juxtaposition the first end of the container where the whole blood is initially introduced, the cell layer, the gel layer, the plasma layer and the second end of the container, and the closet prior art to Ericson et al (EP 001, 200) fails to teach of inserting the tube containing after centrifugation the first end of the tube where the whole blood is initially introduced, a cell layer, a gel layer, a plasma layer and the second end of the tube directly into a spectrophotometric device for analysis of the plasma layer; rather, Ericson et al teach of using a needle to withdraw the separated plasma layer from the tube for analysis.
